SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

The production plan for the HV Schwerchemie (Main Administration for Heavy Chemicals in the Ministry of Heavy Industry) allegedly provided for a production valued at 794 million eastmarks during the first quarter of 1955. Goods worth 790 million eastmarks were actually produced during the period mentioned. The export plan was 105 percent fulfilled. All large enterprises, except the Leuna works, allegedly fulfilled their production plan at least 100 percent. The VEB Leunawerk Walter Ulbricht could not fulfill the plan, particularly that for fuel production, because of insufficient deliveries of crude oil. The VEB Buna Schkopau achieved outstanding results.

25X1

Comment: The information that deliveries of crude oil from Austria for the Leuna Works decreased, is correct. In 1954, the plant received approximately 340,000 tons of Austrian crude oil. If the deliveries continue at the present level, the total amount of oil delivered by plants in Zistersdorf in 1955 will be considerably below the 1954 amount.
